

Company Profile

Founded in Australia in 1982, Monarch Group has forged ahead to position itself as a formidable leader in both the commercial and domestic closures industries.

Fundamental to our success is our innovative spirit, mastery of technology and capacity to tune into market needs together with an outstanding research and development team who have established ingenious patents that are exclusive to Monarch Group.

Our reputation for manufacturing innovative quality products using only the highest quality materials, quickly set Monarch Group winning contract with highly reputable companies, most notably, Bovis Lend Lease, Stocklands, Westfields, Leighton Holdings and Multiplex.

The greatest asset of Monarch Group continues to lie in the depth of experience and professionalism of our personnel, many of whom have served the company since its conception.

Through our manufacturing facilities in Sydney, Brisbane and Melbourne, together with an extensive network of installers and agents throughout Australia, we can provide a wide variety of closures, on time and on budget.

This formula has not only made us leading suppliers of closures throughout Australia but we are now considered one of Australia's most successful exporters to Asia.

Mission: With enthusiasm and dedication we relentlessly seek solutions to develop closures that are totally safe, emphatically stronger and even more aesthetically pleasing.
